Many digital cameras and digital scanners come with Photoshop software preinstalled and can import photos directly into Photoshop. However, if you are starting out on the DIY road, you can purchase a pre-compressed version of Photoshop from Adobe for around \$280. On the other hand, if you use Photoshop as your main image manipulation program (a case I could not even begin to make) then you should consider owning a copy of Lightroom, which is an Adobe product that edits pictures that were shot using a digital camera or scanner. It's one program you should consider if you use Photoshop on a regular basis or even as your primary editing program. In this chapter, I show you how to use some of Photoshop's more useful tools and features, as well as all about the layers that are at the core of the program. I also show you how to save your work, and I teach you how to print your images. Being honest, any image-editing program has tools that you can use, and you can manipulate your pictures in many ways. In the end, I show you that Photoshop is a powerful tool, but I don't get into detailing how many layers, masks, effects, filters, and other options you can create in Photoshop. If you don't know Photoshop, you're better off looking around for free programs online to do some image manipulation. Then you can become familiar with the features you want to use in your work, like layers and masks, before you purchase a copy of Photoshop. I show you a number of programs on websites that you can use to manipulate an image in ways similar to Photoshop in this chapter. Because digital images are highly mobile, you may be interested in loading one image onto your phone, tablet, or other mobile device. I show you how to do so in this chapter. ## Getting Started with Photoshop If you're just getting started with Photoshop, you have to choose whether you're going to use the standard version of Photoshop or a program called Photoshop Elements. Elements is a free Adobe program that includes most of the features of the full version of Photoshop, as well as some additional features. If you're looking for a free, easy way to edit your images, you may want to check out the program. After all, it does include enough functionality that you may never have to purchase the full version of Photoshop. However, if you regularly use Photoshop's tools to manipulate images, or if you just want to familiar

I mentioned this in my last round up, but I have had my eye on the balm trend for a while now and am so excited to find out that The Balm, the supremely popular makeup brand is releasing a new limited edition collection at the end of this month! The real deal is that The Balm is known for making really high quality products and this limited edition is no exception. In fact, this summer is the 50th anniversary of the brand, and to celebrate the important milestone they are releasing a 50th anniversary palette! Now don't panic, the palette is only \$50 (!!!) and only available for a limited time from May 30th - June 14th, but if you're going to be celebrating anyways, it's probably not a bad idea to buy in for the #gettonearly. The palette contains 4 lip shades, 2 bronzer/blush, and 2 highlighters and they look absolutely stunning! Anyways! 1) Bronzer I love loose mineral bronzer in the summer, and I have a big soft pink palette that I used in the past to get the most natural bronzed look, but a gel/baked version sounds like the better option this time around. I haven't had good experiences with warm browns in the past because they look great on brown skin, but I'm super excited to try out the new cool toned taupe shades in this palette. My idea of this collection is to wear bronzer on my cheekbones in the morning, bronzer on my nose at the end of the day, and a light application of the taupe highlighters under my eyes. 2) Blush Have you noticed that since Inst

We're back for round two, I'm good. Sorry for the late notice, it's been a crazy week. To start things off, the assumption is that your monsters are all attacked every round and you can't help this event. Unlike the last campaign, this is as far as I'm going to let my descriptions go. If you want more details, it's best you ask your GM. You're in a fantasy world, one that seems familiar. Monsters, people, and the odd decaying object move about the region. It doesn't have much of a political structure, it's just people banding together to protect themselves and their belongings. At least, that's what you thought until the time came to head into town to buy supplies. The town is dead, save for a few scatterings of corpses. The guards are all dead with the exception of one that stumbles groggily out of the way. As you pass by the front door to your inn, you discover the corpses of your friends and compatriots are scattered about the place. The bodies of guards lie outside, as well as that of the innkeeper. What happened? The last time you saw your friends and compatriots, they were alive and well. What could have happened that would lead to such a harrowing scene? The player's choice: You can run in and see the local authorities. But what do they know? They're probably on some other assignment at the moment. Maybe the guards came across something unusual or menacing and took to their weapons? You can wait around and try to get a word with the innkeeper before a resident from one of the nearby towns comes by to ask about the inn's business. It's a good idea to keep an ear out anyway since the inn's door is always open. You can take the last opportunity to speak with your friends in hopes that you can unearth some idea what might have happened. Your Challenge: The party went to a party. The idea was to meet some locals who were members of another large, possibly dangerous, society that worshiped the exact same monsters you see before you. You were told to keep a watchful eye out for members of the cult, since they have a habit of kidnapping people and turning them into monster's cultist slaves. It's not clear if you're expected to make sure the cult is not among them or if it's just
